

LIFE Networking Event

December 12th, 2019, Nicosia

Guest Speaker:

Paraskevi Panteli, Association of Solid Waste Management of Crete (ESDAK)

Presentation Topic

Mrs Paraskevi Panteli will be representing ESDAK and will be sharing their experience with the LIFE-F4F (Food for Feed) Project (www.life-f4f.gr). This project aims to evaluate an innovative, simple technology and low emissions process that allows the safe transformation of source separated food wastes - from hotels, the food service sector and households - into animal feed, utilising an altered solar drying process. For this purpose a pilot unit has been developed, which can produce 40-50 tons of animal feed per year.

Biography

Mrs Paraskevi Panteli is Head of the Quality Management Department at the Association of Solid Waste Management of Crete (ESDAK). She is also Project Manager of the LIFE-F4F (Food for Feed) project, for which ESDAK acts as coordinator. She previously held the position of Environmental Scientist in ESDAK. Mrs Panteli holds a Master's Degree in Environmental Science and Engineering from the University of Crete. She also holds a BA in Biology from the same University and a BA in Environmental Science from the University of the Aegean.
